SUMMARY

<https://dougmbaya.github.io>

Strategic architect with 10+ years driving ISV, GSI, and partner integrations in applied AI, LLMs, and hybrid & multi-cloud environments. Deep experience enabling partners through reference architectures, hands-on enablement, and production-grade AI system design. Proven leader who has delivered \$200M+ in influenced revenue, increased ISV partner product adoption by 30–50%, and accelerated time-to-market by 40% through automation and architectural rigor. Adept at aligning technical vision with business goals, leading cross-functional teams, and influencing executive stakeholders globally.

CORE COMPETENCIES

- Generative AI and LLM Architecture (LangChain, vLLM, Ollama, Amazon Bedrock AgentCore, Strands Agent, MCP Server)

PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS)

Lead / Senior Partner Solutions Architect – Data & AI (2022 – Present)

- Led 20+ technical integrations between AWS and global ISV partners across analytics, AI/ML, and generative AI, accelerating partner go-to-market delivery by 40% and increasing joint solution adoption by 35%.
- Architected and delivered end-to-end data pipelines (ETL, streaming, visualization, ML model deployment), enabling partners to reduce deployment time by up to 50%.
- Spearheaded cross-functional programs aligning AWS service teams, ISVs, GSIs, and partner engineering to co-develop applied AI and LLM-powered solutions, including reusable reference architectures and integration patterns.
- Drove \$200M+ in influenced revenue pipeline over the last two calendar years, positioning AWS as the preferred platform for AI-powered ISV and partner solutions.
- Regularly engaged C-suite and senior technical stakeholders to define solution architectures and business growth strategies.
- Led partner enablement and thought leadership through blogs, technical workshops, and live coding sessions (including AWS re:Invent), demonstrating applied AI, agentic workflows, and LLM orchestration using tools such as Strands Agent and MCP Server, with production-grade deployment best practices.

Lead / Senior Technical Account Manager (2017 – 2022)

- Led a team of 8 Technical Account Managers, achieving a 25% improvement in customer satisfaction scores through proactive architecture and advocacy.
- Drove hybrid-cloud migrations for enterprise customers, cutting infrastructure costs by 20% on average.
- Influenced AWS product roadmaps by advocating for customer feature requests across 5+ services.
- Handled critical escalations for Tier 1 accounts, reducing average resolution times by 30%.

VMware**DevOps Systems Engineer / Observability Team Lead (2014 – 2017)**

- Designed and implemented observability platforms for global infrastructure, improving system uptime from 97% to 99.9%.
- Led a distributed team of 6 engineers supporting SOC2 and HIPAA-compliant deployments.
- Reduced mean time to repair (MTTR) by 40% through automation and proactive monitoring.

Microsoft**Systems Engineer, DevOps (2013 – 2014)**

- Maintained and optimized backend services supporting a mobile app store platform serving 10M+ daily requests, ensuring 99.9% uptime and responsive user experience across global regions.
- Designed and implemented a centralized monitoring and alerting system (Azure Monitor, ELK stack) across 1,000+ compute nodes, improving incident detection and response efficiency by 60%.
- Contributed to early cloud modernization initiatives, helping migrate internal workloads to Azure and setting the foundation for scalable, automated DevOps practices.

EDUCATION

- MBA, Salem State University
- Bachelor of Business Administration, Protestant University of Congo
- Associate Degree, Computer Science and Networking, North Shore Community College

CERTIFICATIONS

- AWS Certified Machine Learning Specialist
- AWS Certified Analytics Specialist
- AWS Certified Solutions Architect Professional
